| # | Company / Division   | Note:  |
|---|--|--|
| 1 | Columbia Forest Products, Woodlands operations on 3 licenses, ON   | The Scope of this certification was limited to woodland operations, that is harvesting operations, as Columbia Forest Products does not have forest management responsibilities. Moreover, the figure listed of 110,000 m³ is not actually an AAC, but rather the average amount that Columbia harvests each year based on its Ontario Ministry of Natural Resources aspen harvesting permits on all three licences. |
| 2 | Grant Forest Products Inc., Englehart, ON  | Grant Forest Products does not complete forest management planning. The certification covers forest operations where GFP is a shareholder on the SFL as well as any overlapping licences.  |
| 3 | Island Timberlands, South Island Timberlands, BC   | Island Timberlands has certifications to ISO, SFI and CSA but the details were not available at the time of producing this report.   |
| 4 | Saskatchewan Environment, Forest Ecosystems Program, SK  | This certification does not apply to a forest management area but rather Saskatchewan Environment's (government) functions and associated activities undertaken by staff on forested crown lands, such as forest policy development, integrated land use planning, government silviculture and inventory programs.   |
| 5 | Fort St. John Pilot Project Participants (BC Timber Sales, Cameron River Logging Ltd., Canfor, Louisiana Pacific Canada Ltd, Slocan Forest Products Ltd, Tembec Inc), Fort St. John Timber Supply Area, BC | The vast majority of these participants are FPAC members, hence this certification has been highlighted as an FPAC member for FPAC statistical purposes, however officially "Fort St. John Timber Supply Area" is not an FPAC member.  |
| 6 | Island Timberlands, South Island Timberlands, BC   | Island Timberlands has certifications to ISO, SFI and CSA but the details were not available at the time of producing this report.   |
